TRAINING OPPORTUNITIES

TEACHER PERFORMANCE EVALUATION SYSTEM TRAINING FOR EVALUATORS

This workshop provides participants with the tools to adapt and implement the VDOE Teacher Performance Evaluation System and features an application of research-based evaluation tools through hands-on activities and simulations.

FORMATIVE FEEDBACK TO SUPPORT TEACHER GROWTH

Participants learn about “good” evidence and why it is crucial to feedback, what makes feedback effective, the importance of reflective conversations, and how to conduct feedback conferences that work for both administrator and teacher. Classroom videos highlight key points and allow participants to practice the process of “What did you see?” and “What would you say?”

MAKING SUMMATIVE DECISIONS/INTER-RATER RELIABILITY

This simulation-based workshop features the use of multiple data sources in making summative evaluation decisions for teachers. Using video demonstration lessons, observational records, student survey results, and artifacts, participants focus on building inter-rater reliability in summative decision-making.

WORLD CLASS SCHOOLS: WORLD CLASS PRINCIPALS

One of the most reliable factors associated with world class schools is sustained, insightful, and highly capable leadership - in essence world class leaders. Highly effective principals and other school leaders are the key that unlocks school improvement and success, as well as increased student learning. Thus, it is essential that we select, support, and retain the best leaders if we want the best schools. This workshop focuses on the qualities of world class principals, the skills that make a difference in school success, and how to assess and support the best principals. Additionally, the workshop will explore school leaders' competing demands for time and address the imperative that principals and leadership teams do the right work and do it well.

PRINCIPAL PERFORMANCE EVALUATION SYSTEM ORIENTATION

This workshop provides principals and their evaluators with the tools to adapt and implement the VDOE Principal Performance Evaluation System. This workshop features application of research-based evaluation tools through hands-on activities, as well as using multiple data sources when making summative decisions.

INTERACTIVE LEARNING TOOLS

Interactive Learning Tools (ILTs) are designed to increase professional knowledge within various subsets of the teacher performance standards used in the Stronge Evaluation System and identified in *Qualities of Effective Teachers* (3rd ed.) (Stronge, 2018). The ILTs may be used for: teacher and administrator growth and development, asynchronous learning through your LMS, and synchronous learning with a division facilitator. Through videos of K-12 classrooms, practical exercises, reflections, self-assessments, and collaboration, the ILTs provide research-based support and engaging learning. The modules include a short topical reading based on the latest research, video snippets (as applicable), and a participant handout with practical takeaway activities. Each module is available as a weblink and can also be uploaded to your Learning Management System.
